EDOXIONARY

FOR WATCH PROFESSIONALS

2017 – 2018

EDOX

Maître Horloger - Les Genevez
depuis 1884

TIMING FOR CHAMPIONS

THE EDOX HISTORY

CHRISTIAN RUEFLI-FLURY

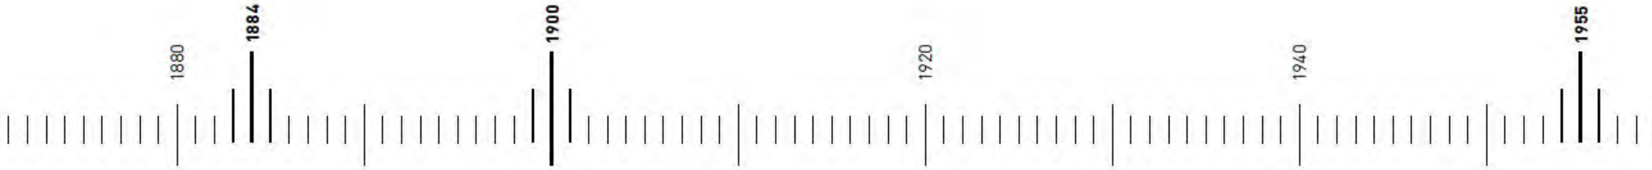

FOUNDER OF EDOX

1860 Born in Courrendlin (Switzerland), son of a foundry master. Educated in Courrendlin.

1870 Moved to Grenchen (Switzerland). Commenced horology apprenticeship with Urs Schild, one of the great Master Watchmakers, before joining the Eterna watch company.

1883 Married Pauline Flury. Worked for Jean Ægler - watchmaker in Biel/Bienne until 1883.

1884 Founded his own watchmaking atelier in Biel/Bienne. Principal founder of the Lake Biel-Bienne Steam Boat Company and originator of the Evilard funicular and the Wildermeth Hospital in Biel/Bienne. Made numerous significant donations to regional hospitals and to children's nurseries in Biel/Bienne and gave monetary support to retirement homes and sanatoriums for the hard of hearing.

1884

IT ALL BEGAN WITH A TRUE LOVE STORY

Christian Ruefli-Flury, a highly talented and romantic watchmaker "Maître-Horloger" from Grenchen in Switzerland, produces a pocket watch for the 25th birthday of his beloved wife Pauline. Impressed by this exquisite gift, she convinces her husband to set up his own watch making company in Biel, a city famous for its well-educated watch engineers. Christian Ruefli-Flury called his company "Edox" which means "measuring of time" in ancient Greek.

1900

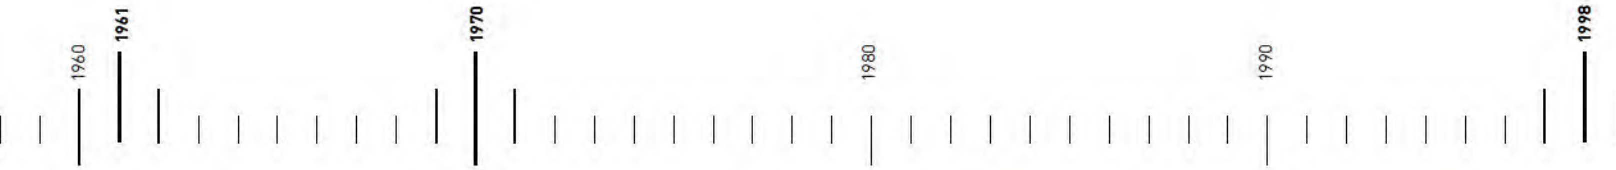

THE BIRTH OF A LOGO

The hourglass was officially used as a timeless symbol of Edox and since then, it has been a proud part of the official Edox company logo.

1955

A GROWING COMPANY

At that time, Edox employed up to 500 watchmakers and the company moved into new, modern and larger production facilities. Edox was amongst Switzerland's leading watch companies.

1961

THE WATER CHAMPION

The famous "Delfin" timepiece was launched, featuring a double caseback, special protective gaskets and a specially invented double O'ring system, setting new standards of shock protection and water resistance.

1965

HYDRO-SUB

The revolutionary Hydro-Sub collection was launched, featuring the famous double O'crown patented Edox gasket for increased water resistance.

1970

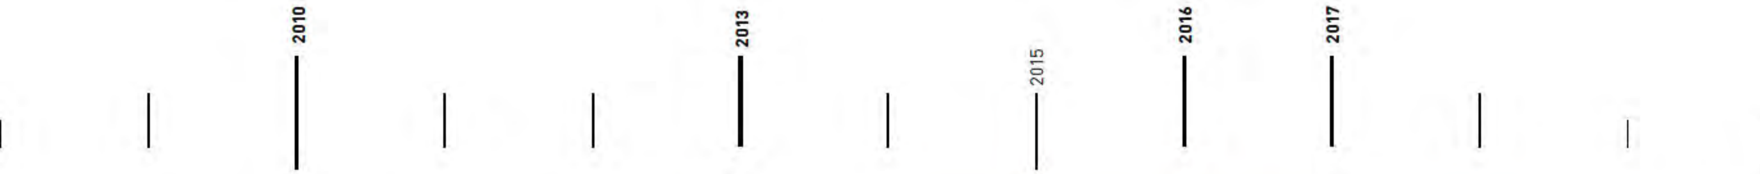

THE FIRST GENUINE WORLD TIME WATCH

This year saw the introduction of the world's first truly global timepiece, the "Geoscope" watch. Covering all time zones, the watch provided timekeeping for almost 50 different cities around the world, as well as local time.

1998

WORLD RECORD STILL UNBROKEN

Edox engineers and watchmakers developed the world's slimmest calendar watch, the "Les Bémonts Ultra Slim" collection. The movement had a thickness of only 1.4 mm, which is a technical record still held by Edox to this day.

2010

THE TIMEKEEPER

Edox becomes the official WRC timekeeper and launches a new collection dedicated to rally drivers, true virtuosos of the tarmac, snow and ice, and to all devotees of the automobile and motor-racing world.

2016

Sauber F1® Team

Edox is the official Premium Partner of **Sauber F1® Team** and steps in the thrilling world of Formula 1.

A new collection dedicated to this prestigious partner is also launched in 2016. This partnership is a strong testimony of Edox's presence amongst the most reknown and active Swiss watch brands.

2016

NEW FACTORY

Due to growing production demand, the factory capacity has expanded with a second floor.

2017

FLEET 1650 PROJECT

Edox has decided to underwrite the quest to protect World Maritime Heritage and to support the research of the Tijger shipwreck in two 2017 maritime operations. The new Delfin Fleet 1650 Limited Edition timepieces illustrate this new partnership.

The entire Grand Ocean collection pays tribute to the world of regattas, that nautical discipline where technical sophistication, precision and team spirit make all the difference.

GRAND OCEAN

SPIRIT OF THE OCEAN

SKIPPER SAIL PORTUGAL

“When sailing race request precision and full reliability, and thanks to its knowledge and engineering reliability, Edox proposes timepieces that are fully in adequation with the sailing world.”

Offshore pilots are real heroes of extreme water races.

They have to keep their nerves under all circumstances, have perfect timing reaction and ensure the perfect race and aim for the title. The speed sometimes reaches a breathtaking 270 km/h. What pilots often say is “What you see in front of you is already history”.

CO-1
OFFSHORE INSTRUMENTS

PAL VIRIK NILSEN, PROFESSIONAL POWERBOAT PILOT:

“My CO-1 reflects my sport and my offshore racing boat: robust, water resistant, shock-resistant and with high-precision movement.”

The Delfin collection was first launched in 1961 and used revolutionary watch parts such as double O'ring gaskets for crowns and pushers and a special shock absorbing caseback in order to withstand an impressive water resistance of 200 meters.

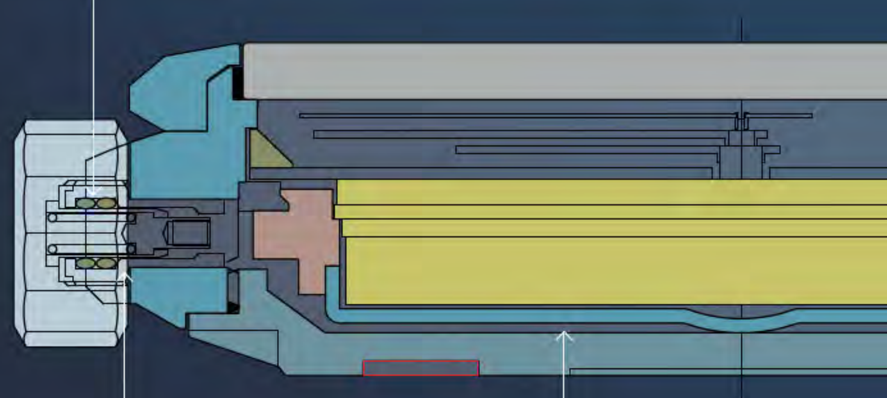

Nowadays, this special equipment is still featured in Edox Delfin timepieces.

DELFIN THE ORIGINAL

THE WATER CHAMPION WATCH

2 Double O'rings for crowns and pushers, special shock absorbing caseback
Joints doubles pour la couronne et les poussoirs, fond spécial pour absorber les chocs
Krone und Drücker mit Doppel-O-Ring-Dichtung; verstärkter Gehäuseboden für besondere Stosssicherheit
Juntas dobles en coronas y pushers, tapa especial con mayor protección antigolpes
ダブルOリングを備えたリューズとプッシュボタン、耐衝撃性能のケースバック
雙防水圈的錶冠及按把，特殊防震後蓋，
Двойные O-прокладки заводных головок и кнопок хронографа, специальный амортизирующий корпус
حلقتان للتيجان والمكابس، وغطاء خلفي مصمم لامتصاص الصدمات

DELFIN THE ORIGINAL

THE WATER CHAMPION WATCH

1 Superluminova applied on the hands and indices for reinforced luminescence (60% better than standard quality)
Superluminova appliqué sur les aiguilles et index pour une luminescence renforcée (60% meilleure que la qualité habituelle)
Indizes sowie Zeiger mit Leuchtmasse (Superluminova GL X1) beschichtet. Dies führt zu einer ca. 60% besseren Leuchtkraft gegenüber einer Standardqualität.
Superluminova en agujas e índices para reforzar la luminiscencia (60% mejor que la calidad standard)
アップライドインデックスと針にスーパールミノヴァを採用。（通常のルミノヴァよりも60%以上の発光）
加強夜光效果的指針與刻度. (比標準亮度高出60%)
Суперлюминова нанесена на стрелки и индексы для обеспечения более яркого свечения (на 60% лучше стандартного качества)
طلاء سوبرلومينوفا الفسفوري على عقارب الساعة وعلى الأرقام لإنارة قوية
(أقوى بـ ٦٠٪ من النوعية العادية)

SAVING WORLD MARITIME HERITAGE

Hundreds of wrecks around the busy sea-lanes of Indonesia's vast archipelago are particularly vulnerable. Every wreck has its own story and in order to pay tribute to men who protect these heritage sites, Edox will underwrite a fascinating project to reaserach, record and protect such sites.

The story begins in February 1650. 5 ships of the famed Dutch East India Company, led by the flagship Tijger stranded on the tiny sansback of Kabaena in Southeast Sulawesi (Indonesia). Only remains of Tijger and another yet unidentified vessel were discovered by a team of researches in April 2016. In 2017, the Arqueonautas Fashion Brand and the Indonesia's Bureau for the Protection of Cultural Heritage will conduct a survey on the site and try to confirm the Tijger remnants.

Edox is proud to support this detailed reconnaissance and survey on the site, exactly 367 years after Tijger and her sister ships were lost.

More information on www.edox.ch/collections.

BRONZE

A fascinating material often associated with the sea. Bronze is highly resistant to the corrosive action of salted water and atmospheric components. It preserves its warm original tones, while acquiring a superb worn look, thanks to the patina which forms over time, making every watch unique.

When master watchmaker Christian Ruefli-Flury made a pocket watch in 1883 for his beloved wife Pauline, she influenced him to set up his own watch-making company: Edox.

It was a decision fuelled by vision, expertise – and love.

More than 130 years' on, Edox brings its watch-making passion, quality, craftsmanship and engineering to the fore the LaPassion collection.

Driven by superb and heart-warming feelings such as passion or love, the collection reflects the feminity and elegance that all ladies feel when they are beloved.

Farmers in summer working the soil in the fields or breeding their cattle, our predecessors began working as watchmakers during the harsh winter months in order to make some money to sustain during the coldest period of the year.

Getting more and more professional and developing their skills, the former farmers slowly became highly skilled watchmakers.

EDOX

COMPANY PRESENTATION

Vision

Edox is steadily becoming one of the three most successful Swiss watch brands in the high-volume price segment of 400-4,000 Euros. Edox intends to set the standard when it comes to design, price and quality within this price range.

Positioning in relation to the competition

Edox distinguishes itself from other brands thanks to its clearly segmented collection. None of its competitors' ranges (Tag Heuer, Longines, Baume & Mercier, Raymond Weil) in the middle price bracket offer such customer-oriented coverage of the various market segments (see target groups). Edox stockists can address four lucrative segments and thus enjoy a real advantage.

Positioning

Edox is building a lasting reputation in the field of sports timing as the "Timekeeper for Championships". Edox is an autonomous and independent Swiss watch brand that is predominantly sports-oriented in the middle to upper price segment. It offers a full range of high-profile designs aimed at a young clientele with strong purchasing power and an eye for quality.

The communications strategy

The concept is based on the sentence "Timing For Champions". The implementation of this strategy focuses on the presence to exclusive international events such as the logo presence on Formula One racing cars of the Sauber F1® Team. These events are broadcasted throughout the year on hundreds of international TV channels and this means that million of people see the Edox logo on the racing cars. This presence raises Edox's profile significantly and achors viewers' awareness of the brand.

Country-specific communication projects rely on high-circulation print, electronic lifestyle or special interest publication and social media activities. These are boosted by Edox partnership with Sauber F1® Team.

The Edox watch

An Edox watch stirs your emotions. Its design is distinctive and its sophisticated technology based on proven, established and dependable mechanics and electronics. Edox watches in this price category offer exceptional quality, captivating Edox owners around the world and impressing international watch connoisseurs.

The product strategy

Edox watches carry the prestigious Swiss Made logo, an important and legally protected trademark attesting to the quality of luxury watches. Since 1884, Edox watches have been hand-produced by skilled watchmakers with a reputation for precision work in the Swiss Jura, a region that is globally renowned for its watchmaking prestige. The collection is aimed at four precisely defined target groups (see description of target groups).

FRIENDS AND PARTNERSHIPS

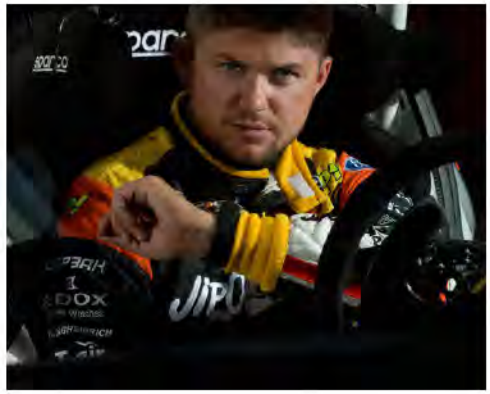

photo: XCAT world series

Sauber Motorsport

In 1970 Peter Sauber founded his company and designed his first racing car in the cellar of his parents' house. The race team grew steadily and enjoyed its first major international successes in the late 1980s. As the Mercedes works team, Sauber celebrated a one-two victory in the Le Mans 24-hour race in 1989 and back-to-back Drivers' and Manufacturers' titles in the World Sports Car Championship in 1989 and 1990. In 1993 Sauber entered Formula One. Among the team's F1 highlights have been a fourth-place finish in the Constructors' World Championship in 2001 as an independent team and – in partnership with BMW – a one-two finish in the 2008 Canadian Grand Prix on the way to third place in the constructors' standings that year. In 2010 Sauber became an independent outfit once again. 2012 was a very good year of the **Sauber F1® Team**, headlined by four podium finishes, 126 World Championship points and sixth place in the constructors' standings. The 11th October 2012 marked a milestone in the history of the team – the day when Sauber stepped down as Team Principal and passed on the baton to Monisha Kaltenborn. Between 1993 and the end of 2015 the team contested 403 grands prix in Formula One. Sauber has its headquarters in Hinwil, in the Swiss canton of Zurich. The team's state of the art factory houses manufacturing facilities and offices spanning an area of 15,600 square meters and boasts one of the most advanced wind tunnels in F1.

Martin Prokop

Martin Prokop was born in Jihlava 1982. Since chilhood he was dreaming to become a rally driver. In 2001 this dream came true and Martin made his first debut on Rally Vysocina with Skoda Felicia.

In Monte Carlo 2005 Martin started t in the Junior World Championship with Citroen C1S1600. One year later he celebrated the victory on Catalunya Rally. The most succesfull season was 2009 when Martin won the Junior World Champion title.

In Argentina 2012 Martin made a new record for Czech crew and reached the 4th place with his co-driver ZdenÐk HrÐza. One year later he repeated it in Germany and this year again Argentina.

Pal Virik Nilsen

Pal Virik Nilsen from Sandefjord, Norway is one of the most experienced and best powerboat pilots in the world. His career the last 22 years with over 270 races, has been filled with almost all classes and type of boats the international federation (UIM) can offer in the sport of powerboating.

Virik Nilsen is a former World Champion, three times Australian Class-1 champion, and two times Norwegian Champion. All in all he has six UIM international medals from European and World Championships both categories Offshore and Circuit racing.

During his career Pål has been driving for some of the best teams in the world such as "Spirit of Norway" "Victory team UAE" and Maritimo Australia among others. Pål is probably the most fit driver in the sport with training every day all year long. With the goal to be maximum prepared mentally and physically before and during every Powerboat season.

In 2009 he was awarded the Motorsport personality of the year in Norway. A prestigious award that covers all motorsport categories available in Norway!

Pål is also a member of the international athletes committee in the federation. In Norway he is currently the leader of circuit federation group and vice president in the powerboat section.

A truly passionate powerboat pilot and ambassador!

Christian Redl – The Iceman

Born in 1976, the Austrian Christian Redl fell in love with water as a young boy.

But 1996 was a major turning point for him when he saw the cult film The Big Blue and took up free-diving. At a championship meeting the same year, he met the famous free-diver, Umberto Pelizzari. A vocation was born.

This true merman, who tests the limits of the endurable, is considered to be one of the foremost free-diving specialists of his generation.

Christian Redl also holds several world free-diving records: the most impressive probably being the longest ever swim under ice (100 meters), though the crossing of several underwater caves in Mexico cannot be ignored. Christian Redl holds the record for the deepest free dive under ice to a depth of 60 meters, but has also been to the North Pole in April 2015 for a first world free dive under the ice.

Curling Team Ulsrud

Team Ulsrud is Norway's national curling team. Haavard Vad Petersson, Christoffer Svae, Torger Nergaard and Thomas Ulsrud started playing together in 2007. Among their many international achivements, their proudest moment as a team was winning the silver medal at the 2010 Olympic Winter Games in Vancouver.

VISUAL ADVERTISING WINNERS

Advertising Corporate Guidelines

For Edox, visual identity is highly important. Our "Timing For Champions" campaign has been developed to give more importance to the product.

The Edox Corporate Guidelines are set in order to ensure you that the artwork that you are preparing perfectly matches with the advertising layout instructions.

It also ensures perfect watch visibility with appropriate watch and logo sizes and all layout components.

Advertising

Thank you for helping us in keeping the Edox brand image identical worldwide.

We remind you that all individually-designed layouts have to be submitted to Edox for final approval before printing of production.

All layouts are suitable for advertising, but also for banners, posters, window stickers, lightboxes, etc.

Format A4

All layouts are available on the Edoxnet database (www. edox.ch/edoxnet)

For specific project, please contact Edox for full support.

THE 7 COMPETENCES OF EDOX

Assembled by master watch makers, engineered for champions: for more than 130 years, Edox watches have combined ultimate precision with ingenious solutions – even for the most demanding activities: be it above or below the water surface, in the eternal ice or even on glowing desert sand, any timing instrument from Edox carrying the legendary hourglass logo will meet even the highest demands of its owner. One of the reasons and at the same time one of Edox strength lies in the construction and build quality of our watch cases: from additional case-backs, ultra-complex cases to patented crown seals and guards, Edox has truly mastered the art of bringing together function and design. Or in other words: engineering a watch case consisting of up to 20 single components is probably the best proof of how serious we are when it comes to accomplishing perfection in every detail. Which means that as an owner of an Edox you will ultimately benefit from more robustness, quality and increased comfort.

1 IN-HOUSE DESIGN

Located in the heart of the Swiss Jura, Edox has been working for years with the same proven team when it comes to designing watches that are equally unique as perfect for their intended use:

☑ **Instead of a computer-generated design, each watch is first hand drawn for a more organic look**

☑ **Exclusive made-to-measure and customised components when it comes to straps, dials and hands**

2 ULTRA-COMPLEX CASES

Edox timing instruments are made for performance. Perfect example: Our complex cases usually consisting of more than just the standard three parts:

☑ **Expert in complex case design and engineering**

☑ **Multipart construction with highest precision and attention to detail**

3 RELIABLE WATCH MOVEMENTS

We believe in proven movements from the most reputable specialists. Because we want to make absolutely sure that you can rely on your watch every single second of a day – for years to come. In short:

☑ **Proven Swiss Made calibres from leading movement suppliers**

☑ **World-wide service, reliability and access to spare parts**

4 ULTIMATE PRECISION

When it comes to precision we are convinced that being as strict and meticulous as possible is well worth it. Because you will appreciate the quality and attention to detail:

☑ **The manufacturing tolerance is 1/100 millimetre**

☑ **No standard components are used**

SAVOIR-FAIRE
Our understanding of quality is one of the reasons we are successful

5 SWISS HANDMADE MASTERPIECES

Every single part of an Edox watch is made to exact specifications with the lowest possible fabrication tolerances. Nevertheless: Assembly and regulation are still done by hand by skilled watchmakers in Les Genevez, Switzerland.

☑ **One watchmaker is responsible for the whole watch during assembly and regulation**

☑ **Production and quality control are strictly separated**

6 TIME FOR INNOVATION

Edox has a long tradition of finding smart solutions for complex challenges, such as:

☑ **World's first combined display in a world timer**

☑ **World-record holder for an ultra-flat movement featuring a calendar display**

☑ **Patented double sealed crown (without requiring a screw-in construction) for increased water resistance**

7 MADE FOR CHAMPIONS

Edox has been chosen as official timekeepr of various competitions and races around the globe. Many athletes and explorers have relied on the quality of the Edox watches.

☑ **Premium Partner of prestigious Formula One Swiss team: Sauber F1® Team.**

TECHNICAL INFORMATION

EDOX QUALITY

Batteries

In compliance with global regulations and standards, Edox equips its quartz timepieces with mercury-free batteries. This is a positive step towards environmental sustainability with no effect on the watch precision and efficiency.

Bronze

A fascinating material often associated with the sea. Bronze is highly resistant to the corrosive action of salted water and atmospheric components. It preserves its warm original tones, while acquiring a superb worn look, thanks to the patina which forms over time, making every watch unique.

Conformity

Every component coming into our production facility in Les Genevez in the Swiss Jura is checked to ensure its dimensions, aesthetics, quality and interchangeability.

Edox double O'ring Crown or Pusher

Since the 70's, Edox has set specific quality and technical standards for ensuring the water resistance of diving timepieces. The double O'ring crown or pusher has been engineered by Edox to allow to increase the resistance to water pressure. Timepieces equipped with crowns or pushers featuring a double O'ring are featuring the special pictogram for easy understanding.

Helium Escape Valve

Some of our CO-1 timepieces are equipped with a decompression system which allows helium to escape from inside the watch when worn for professional use in pressure chambers (long-term underwater work, crude oil exploration, etc).

The Edox helium valve opens and closes automatically. It is imperative that the models equipped with a non-automatic helium escape valve (such as older Edox timepieces) have the helium valve screwed back in order to guarantee their water resistance.

Leather

All Edox leather straps are specially cut, stitched and padded by expert craftspeople. Various ways of tanning provide different touch and feel for the straps made of cow or calf leather. It is always important to remember that colors and suppleness of leather are subject to change with time and exposure to external factors. Daily showers or swims are not recommended. If your consumers live a very active lifestyle, especially one involving frequent exposure to salt water and heavy perspiration, we recommend a steel bracelet or rubber strap.

Luminescence

This technology, branded under the name Super-Luminova, offers brightness in low-light conditions, thanks to a non-radioactive and non-toxic material like the tritium previously employed in the industry. Edox uses Super-Luminova for its highly functional attributes. It is applied on watch parts such as hands, numerals, bezel indices, etc.

Mother-of-pearl

Resilient, and iridescent, mother-of-pearl is integrated in many Edox dial designs. It is produced inside the shells of certain mollusk shells. This is why each dial made of mother-of-pearl is unique.

Movements

Mechanical movement:
A mechanical movement undergoes several stresses in its life. To ensure it will remain functional and precise as long as possible, Edox simulates watch wearing in its own quality office for every single manual and self-winding mechanism.

PVD

Edox uses PVD coatings which is a high-performance pollution-free and non-allergenic technology also used in the aeronautic industry, is widely used in watchmaking. The process involves putting a fine titanium coating on stainless steel by condensing a metal vapor in a partial vacuum.

Rubber

Edox uses genuine high-grade rubber for its straps (a natural material and extremely comfortable). The rubber is silky finished and easy to maintain with the proper cleaning.

Sapphire crystals

100% of Edox timepieces are fitted with a scratch-resistant crystal that has been cut from a polished slice of solid sapphire. Each has a triple-coated anti-reflective treatment on the internal side for better legibility.

Stainless Steel

The 316L stainless steel alloy used in Edox cases and bracelets has strong anti-magnetic properties and is optimized for toughness and corrosion resistance. It is also a good choice for consumers allergic to nickels.

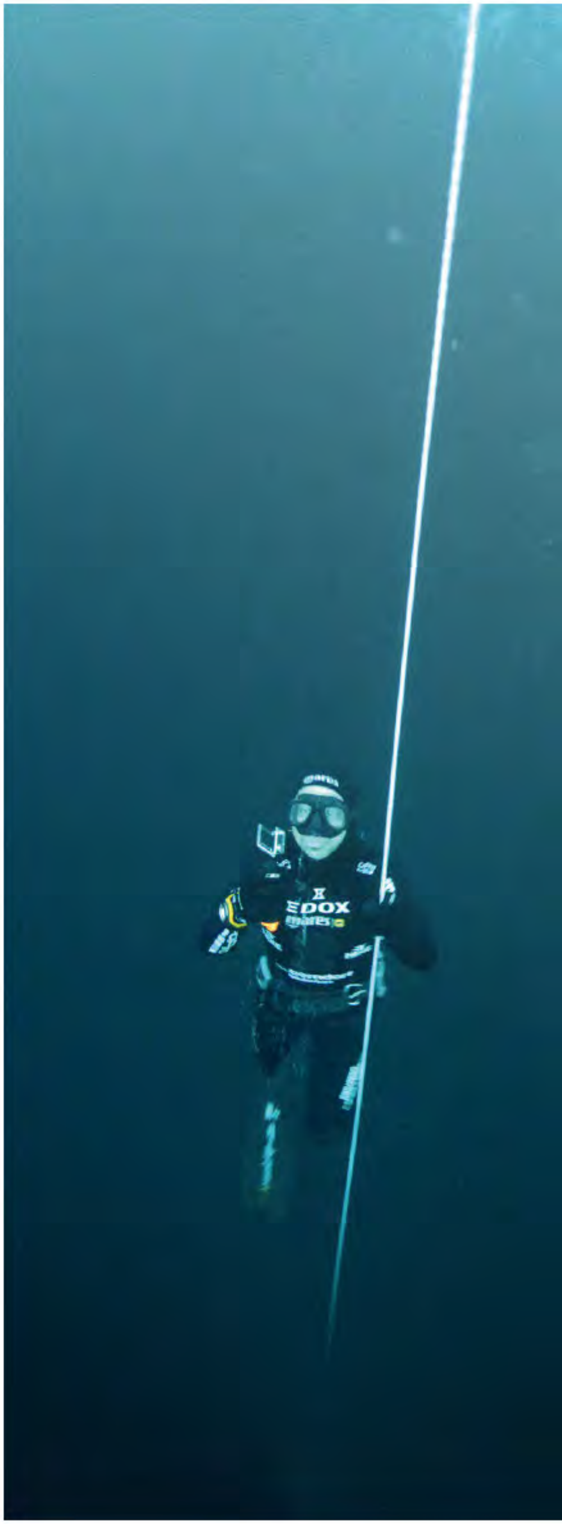

Titanium

Edox integrates this metal to some of its sports timepieces, as it is as strong as steel but 45% lighter and highly resistant to corrosion. The high tensile strength to density ratio makes it the ideal material for active lifestyles.

Visual and manual testing

In addition to our testing process, all timepieces are visually checked between each manufacturing step ensuring overall quality based on our own Edox standards. If a timepiece does not pass inspection, it is checked and repaired. It can only go back to the production phase if it has passed the quality check.

Free Dive World Champion Christian Redl recommends the following Water Resistance:

Water-resistance

Edox watch cases are hermetically sealed using high-grade rubber gaskets and screwed-in casebacks to ensure that no moisture or dust comes in contact with the movement inside.

WATER RESISTANCE CLASSIFICATION

	Meters	Feet	ATM	All Edox timepieces are water-resistant from 30 to 1000 metres. Check the details on the back of your Edox timepiece and read the following instructions carefully.	Collection
	30	100	3	Will withstand rain or splashes of water and accidental immersion, but should not be worn while showering, swimming or diving.	Les Bémonts
	50	165	5	Suitable for showering or swimming in shallow water.	Les Vauberts, LaPassion
	100	330	10	Suitable for swimming or snorkelling.	Chronorally, Chronorally-S, Grand Ocean
	200	650	20	Suitable for swimming or snorkelling.	Delfin
	300	990	30	Suitable for scuba diving.	CO-1, Grand Ocean
	500	1650	50	Appropriate for serious deep water diving.	CO-1

ROUIR	Red / Pink indices

CHRONORALLY
10302 37N NIN Ø 45 MM

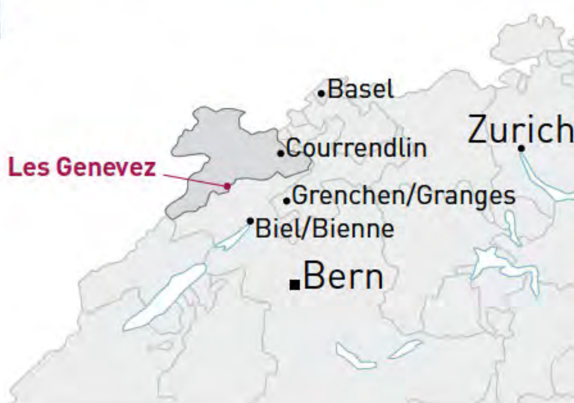

10302 37N NIN
MOVEMENT
The first 2 or 3 digits of these five figures represent the Edox movement code. Please refer to the page 169-173 of this catalogue.

10302 37N NIN
CASE MATERIAL
The digits and/or letters represent the material and surface treatment (colour) of the case. (See the table)

10302 37N NIN
DIAL VARIATIONS
The digits and letters represent the colour and design of the dial.
